

AllPro flat cap sorter

Allpro supply our own designed high speed flat cap sorters that are proven performers in the field today. The flat cap sorter will sort caps on a horizontal positioned bowl that feeds caps in any orientation. Once the caps exit the bowl the upside down ones are rejected back into the bowl. This type of cap sorter needs the cap to be larger in diameter than its height and this allows the output to be doubled from a cavity type system.

Standard machine specifications

Specifications

800mm diameter disk bowl
Reject upside down cap into bowl
600 caps/ minute output
Stainless and Aluminium construction

Cap types

Plastic caps
Diameter is larger than height
